DiversiTech pumps are made by DiversiTech.

DiversiTech doesn't buy someone else's pump and relabel it for sale. All the design, product development, research and development, and testing is done in-house. This means a better product for the customer, built to the highest quality standard.

Why buy a DiversiTech Pump?

Industry-leading features found on DiversiTech pumps:

Red, yellow, and green indicator lights show the pump status. Green for power applied, yellow for pump running, and red for high level alarm.

PAN PILL DISPENSER

A pan tablet dispenser is included free with every pump. Perfectly compatible with DiversiTech's Pro-Treat® pan tablets.

REMOVABLE CHECK VALVE

Removable check valve for easy cleaning.

VIBRATION ISOLATION

An elastomeric motor mounting gasket dampens vibration for super quiet operation.

METAL HANG TABS

Shatterproof stainless steel hang tabs have hole-and-slot design for easy mounting. Tabs are located on convenient 8" centers.

20 FEET CLEAR VINYL TUBING

On "T" models, 20 feet of high quality 3/8" clear vinyl tubing is included for maximum installation ease.

ANTI-VIBRATION RUBBER FEET

Rubber feet dampen vibration and reduce noise.

OVERFLOW SAFETY SWITCH

1/4" quick connect terminals provide easy connection to the built-in overflow switch. Three terminals are provided allowing the installer flexibility to connect air handler shut-down and optional alarm as needed. Switch features SPDT isolated contacts ready for connection to building automation systems.

FOUR INLETS

Four inlets versus two or three on other pumps provide the greatest installation versatility.
