

3.3" Motors

High Efficiency PSC Motors for Refrigeration Evaporator and General Purpose Applications

Horsepower: 1/10 – 1/70 HP

Speed Range: 1550 RPM

Rated Voltages: 115/208-230 Volts

Enclosures: Open Air Over (OPAO) and
Totally Enclosed Air Over (TEAO)

Motor Type: Permanent Split Capacitor (PSC)

Product Overview

Product Features:

- PSC design uses over 40% less electricity than old shaded pole designs
- Features a dual plug to cover multiple Bohn®/Larkin®/Krack® applications
- Reversible rotation allows broader use and reduction in inventory
- Ball bearings for improved efficiency at colder temperatures
- Capacitor included with motor

3.3" Motor

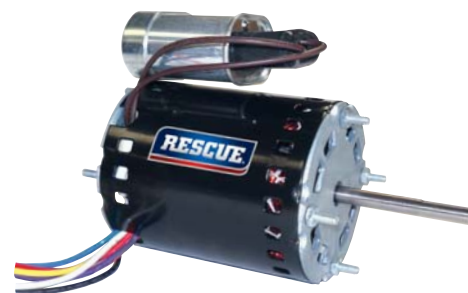

Product Overview *continued*

Set up for wide plug used in Bohn® products

Remove first section for narrow plug (pat. pend.) used in Larkin® products

General purpose and dual voltage motors
